Juneau, Alaska 99811-0601

RE: ARH Laboratory CON request for additional information

Dear Ms. Lawfer,

Please accept this packet of information in response to your request for additional information regarding Alaska Regional Hospital's Application for Certificate of Need for our Clinical Laboratory Remodel.

The packet includes:

1. Updated Section VII of CON Application – Construction Data
2. L1.00 and L1.01 – Site Plan
3. A1.00 – Floor Plan
4. G0.02 – Phasing Plan
5. Exhibit A – Sixteen Division Cost Breakdown Sheet
6. Exhibit B – Project Schedule of Values Form

There are is an additional \$307,368 associated with Architectural and Engineering fees that are on top of the \$3,953,300 shown in the Cost Breakdown Sheet and the Project Schedule of Value Form – which brings the current estimated total cost to \$4,260,668.

I believe these documents address all of your additional information requests. If you need anything else please call me at (907) 264-1443 and I'll respond immediately.

Sincerely,

Rick Davis
Chief Operating Officer

Section VII. Construction Data

A. Please check appropriate boxes:

1. Construction type New Expansion Renovation
2. Basement Full Partial None

B. Project Development Schedule

Date

- | | |
|--|--------------------|
| 1. Estimated completion of final drawings and specifications | September 28, 2008 |
| 2. Estimated construction begun by | May 1, 2009 |
| 3. Estimated construction complete by | March 1, 2010 |
| 4. Estimated opening of proposed services | March 1, 2010 |

C. Facility site data: Provide the following as attachments (referenced by the subsection and item number):

1. A legal description and area of the proposed site. Is the site now owned by the facility? If not, how secure are the arrangements to acquire the site?

This site is already owned by Alaska Regional Hospital.

Legal Description: Alaska Hospital TR B3 Fragment LT 1B.

2. Diagrammatic plan showing:
- a. dimensions and location of structures, easements, rights-of-way or encroachments;
 - b. location of all utility services available to the site; and
 - c. Location of service roads, parking facilities, and walkways within site boundaries.

Not Applicable – already within hospital.

3. Document clearances regarding zone restrictions, fire protection, sewage, and other waste disposal arrangements (under special circumstances, it is acceptable to present evidence of conditional approvals from local government and regulatory agencies).

Not Applicable – already within hospital.

4. An architectural master plan including long-range concept and development of total facility.

Site Plan L1.00 and L1.01 are attached.

5. Schematic floor plan drawings (or conceptual drawings) of proposed activity, including functional use of various rooms.

Floor Plan A1.00 is attached.

D. Describe the plan for completing construction and the effect (disruption) construction activities will have on existing services.

The area defined as Phase 1 is currently an existing breezeway. This area will be enclosed and finished during phase 1 of construction to allow the pathology department to move into the space. Little to no disruption of current services will occur.

Phase 2 of construction is currently occupied by Pathology. Since pathology will be moving into phase 1, prior to phase 2 commencement, construction will have little to no disruption to the current services provided. Microbiology will occupy a portion of phase 2 in the proposed layout.

Phase 3 construction is currently occupied by Microbiology. Microbiology will move into the portion of phase 2 which is complete. The intent is to continue to provide current services in a more compact area. Minimal disruption is expected.

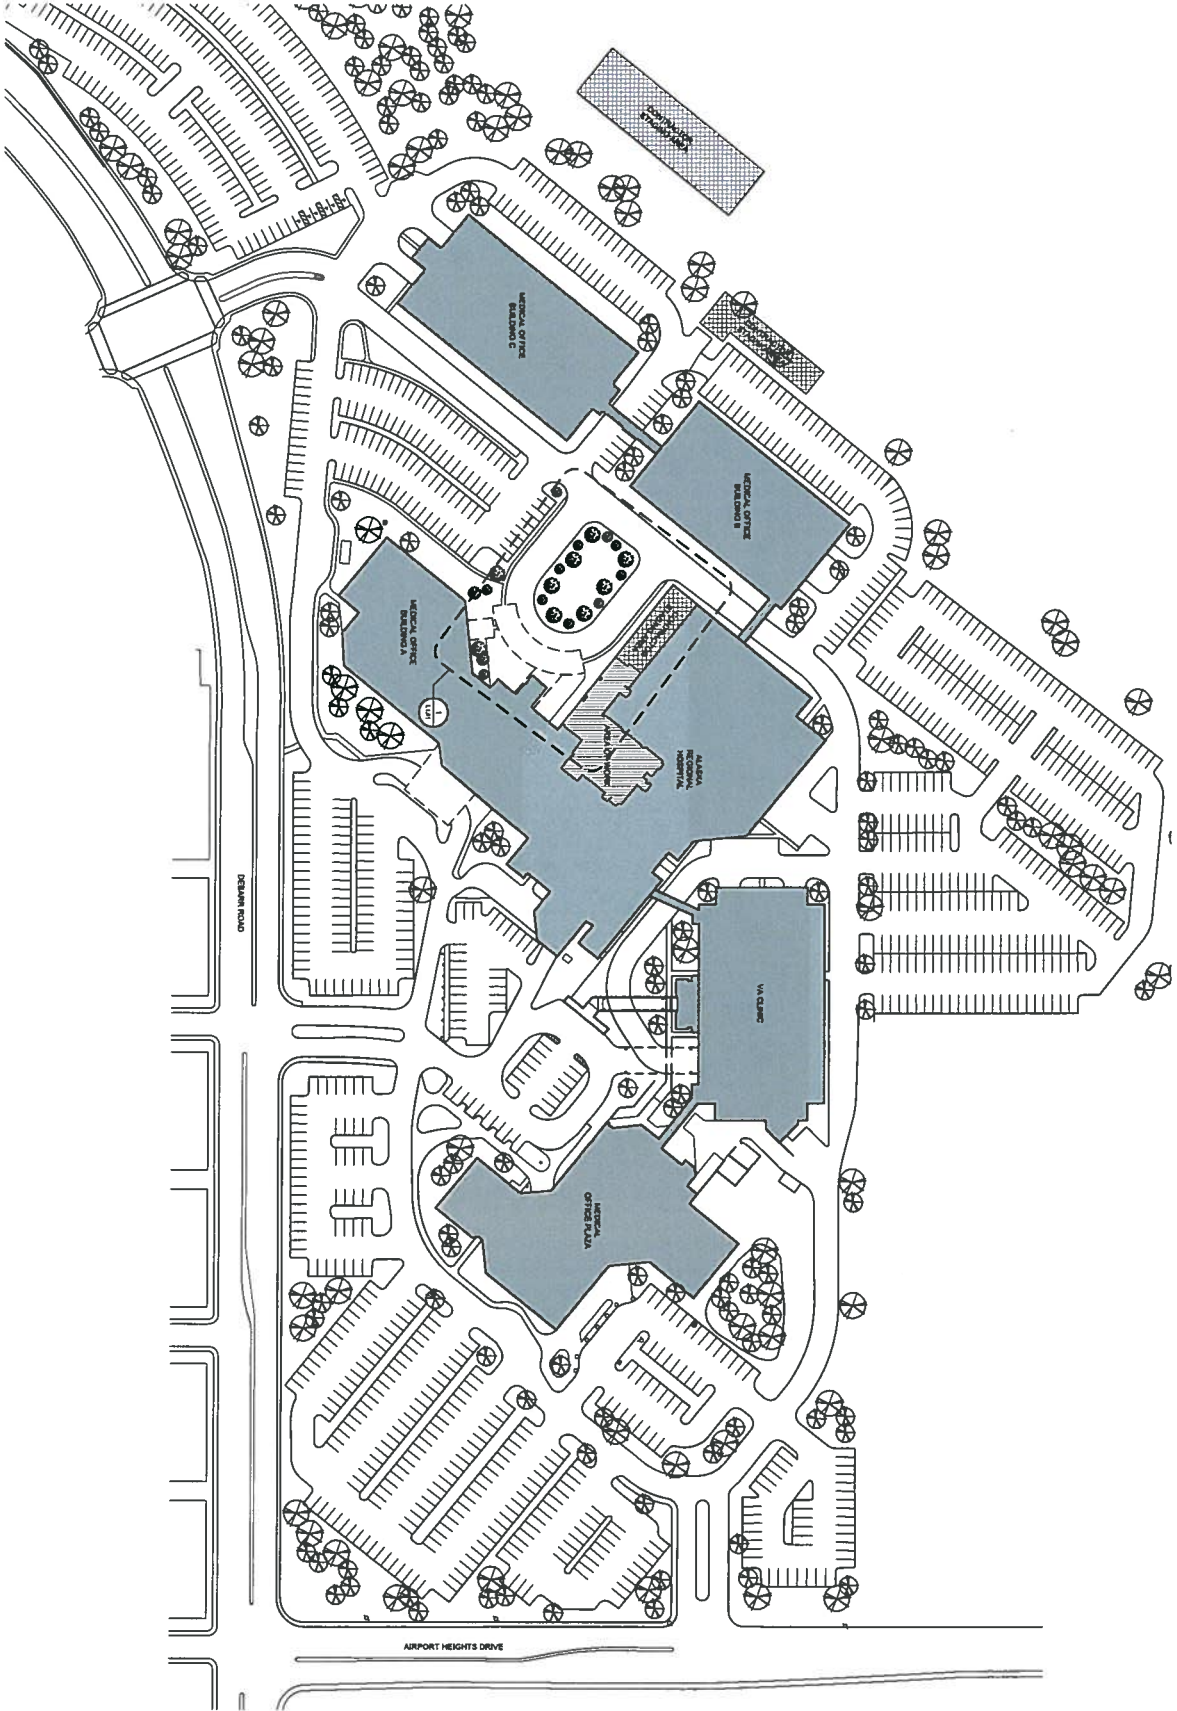

Phase 4 construction is currently occupied by the blood bank. The blood bank will be relocated into another area of the lab during construction. Once construction is complete, the blood bank will move into the space. Although the blood bank will be relocating it will still provide the services it currently provides. Minimal disruption is expected.

Phase 5 Construction is currently occupied by the core lab. This phase will work very similar to phase 4 construction. The intent is to continue providing the services with minimal disruption.

Attached is a copy of the phasing plan, sheet G0.02
