Re: Radiation Business Solutions

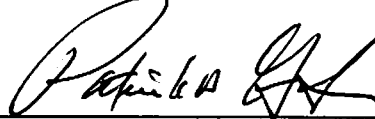

Dear Ms. Lawfer:

Enclosed please find a request for determination as to whether the Certificate of Need Regulations are applicable. Please send your response to RBS Evolution at 115 Main Street, Pleasant View, TN 37146 with a copy to the undersigned.

If you have any questions, please give me a call.

Very truly yours,

ATKINSON, CONWAY & GAGNON

Juneau, AK 99811-0601

Ms. Lawfer:

This is a request for a determination as to whether the requirements of AS 18.07 and Chapter 07 AAC 07.031 – Certificate of Need Regulations are applicable to the following proposal. We do not believe that we are required to obtain a certificate of need to own and operate a linear accelerator for reasons discussed below.

Anchorage Associates of Radiation Medicine, LLC and RBS Evolutions, Inc. propose to construct and operate an outpatient radiation therapy service which consists of a cancer treatment center that will provide external beam radiation treatment of cancers and some non-cancerous tumors using a linear accelerator for treatment. The proposed service will allow residents of the Kenai Peninsula to more quickly and easily access external beam radiation therapy services than is currently available. It is important to the residents of the Kenai Peninsula to have this access since radiation therapy generally requires a course of 25 to 30 separate treatments over separate days. Treatments can be daily and can last 5 to 6 weeks. Currently the only linear accelerator treatment available to residents of the Kenai Peninsula is located in Anchorage. Radiation oncologists will maintain physician control of services and of operations and will direct all services. All appropriate staff (radiation physicist, radiation therapist, as well as radiation oncologist) for this service will be provided. The project will lease land for construction from Soldotna Cancer Center Land Company in Soldotna. The land will be used as the site for construction of a facility to house a linear accelerator for the treatment of cancer.

We believe that the facility, linear accelerator and the program of treatment that we propose to provide is exempt from Certificate of Need review since this service will have ownership by physicians and since the facility will not be a health care facility as defined in AS 18.07.111.

(8) "health care facility" means a private, municipal, state, or federal hospital, psychiatric hospital, independent diagnostic testing facility, residential psychiatric treatment center, tuberculosis hospital, skilled nursing facility, kidney disease treatment center (including freestanding hemodialysis units), intermediate care facility, and ambulatory surgical facility;. the term excludes (A) the Alaska Pioneers' Home and the Alaska Veterans' Home administered by the Department of Health and Social Services under AS 47.55; and (B) the offices of private physicians or dentists whether in individual or group practice;..."

Owners will be Anchorage Associates of Radiation Medicine, Inc (30% owner, 100% physician owned), and RBS Evolutions, Inc. (70% owner, 80% physician owned).

The building will house physicians offices, including some of the physician owners, and will provide treatment for patients with cancers requiring radiation therapy with a linear accelerator. The facility will not be licensed as a hospital of any type, nor will it be licensed as any of the categories of "health care facility" defined in AS 18.07.111. The facility would not be suitable for conversion to a nursing home or for use for ambulatory surgery. The linear accelerator would be licensed for its intended purpose. The proposed expenditure does not involve routine maintenance or replacement of equipment.

Costs will be:

Acquisition of Land	\$ 140,000
Site excavation	\$ 60,000
Other site development costs	\$ 90,000
Building Construction	\$1,500,000
Architectural & engineering Fees	\$ 80,000
Financing Costs	\$ 65,000
Movable equipment	\$ 135,000
Fixed equipment	\$ 140,000
Shipping and installation costs not otherwise included	\$ 210,000
Linear Accelerator	\$1,300,000
Associated Software and Information Technology	\$ 350,000
Total Costs	\$4,070,000

The estimated starting date for this project would be April 1, 2012 with an anticipated opening in November, 2012. Treatment of cancer patients would commence in January 2013.

We will provide any additional information you need. We believe that since the service is not for an applicant that is a health care facility as defined in AS 18.07.111 and since it will be owned and managed by a partnership of physicians that it is not required to seek a Certificate of Need for development and operation of the proposed outpatient radiation therapy service.

Thank you.
