### **Regarding: Request for Additional Information Required for Request for Determination – Fairbanks MRI & CT**

Dear Ms. Hicks:

I received your March 7, 2014 letter requesting additional information in order to make a determination as to whether a CON is required for my project. Below are my responses to your request and I have attached addition supports as necessary.

1. The letter requesting determination states that "leasehold improvements to the space [are estimated] at a cost of \$81,502." However, the certified cost estimate from Architect David A. Whitmore states that "the cost of the leasehold improvements is estimated to be \$188,004." What is the estimated cost of leasehold improvements?

**The estimated cost of leasehold improvements is \$81,502. There was an error in Mr. Whitmore's letter and attached is Mr. Whitmore's corrected letter and a letter of explanation from him.**

2. The letter requesting determination states that the "total cost of the project is estimated to be \$1,379,987[.]" The certified cost estimate states that the "aggregate total cost of the proposed project is \$1,350,000 (sic)." What is the total estimated cost of the project? Can you explain why the certified cost estimate for the total project is lower than the cost provided in the letter requesting determination, especially in light of the fact that the certified cost estimate includes a cost for leasehold improvements that is over \$100,000 more than the cost included in the letter requesting determination?

**The total estimated cost of the project is \$1,380,037. There was an error in Mr. Whitmore's letter and attached is Mr. Whitmore's corrected letter and a letter of explanation from him. I have also**

**attached a schedule showing the makeup of the Total Project Cost.**

3. The letter requesting determination states that the net present value of the property lease is \$133,839. How did you come to this conclusion? Can you provide supporting documentation for this conclusion (i.e. what is the structure of the lease, what are the total lease payments under the terms of the lease, what is the useful life of the asset, and what is the existing age of the asset)?

**I am looking to enter into a two year lease for 3,085sf at the Washington Plaza on Airport Way in Fairbanks, Alaska at a cost of \$2.00 per sf per month. The attached schedule shows the net present value of the \$148,080 of total lease payments is \$133,889. The structure is a wood framed masonry building built in 1984 which has a useful life of 25 years per the American Hospital Association's Estimate Useful Lives of Depreciable Hospital Assets. As building is 30 years old and past its useful life, the net present value of the lease payments is the proper amount to be considered for my project. Attached are documents which show the calculation and information on the structure.**

4. You state that other equipment and furnishings "have an estimated cost of \$6,286." Can you provide a more detailed description of what equipment and furnishings are included in this cost?

**The attached schedule shows the equipment I will be purchasing for the project.**

5. The quotation supplied with the request for determination states that "This quotation shall remain valid for 30 days (not to exceed 60 days) from date of submission." Do you believe that this quotation is still valid even though more than 60 days have passed?

**I have spoken with the equipment vendor and their quotation is still valid.**

I believe the responses above and supporting documents provide the additional information requested by the Department. Therefore, I look forward to receiving your determination as to whether a CON is required for my project.

Sincerely,  
Jeffrey Zuckerman, M.D.

**Regarding: Fairbanks MRI & CT Project Cost**

Dear Ms. Hicks:

I am writing in response to your letter dated March 7, 2014 requesting clarification and additional information in regards to Dr. Zuckerman's Request for Determination. In reviewing your request, I noted that I had given the template letter I was using to Dr. Zuckerman instead of my letter. I remember I had had several computer issues that day and the template must have printed instead of my final letter and that is why there are discrepancies between the two. I have attached my actual letter for your consideration.

Please let us know if we can be of any further assistance.

Sincerely,

David A. Whitmore, Architect LLC

February 24, 2014

Mr. Jared Kosin  
Executive Director  
Department of Health and Social Services  
Section of Planning and Systems Development  
3601 C Street, Suite 978  
Anchorage, Alaska 99503

**Regarding: Project Cost**

Dear Mr. Kosin:

We have been hired to provide professional services for a project currently being planned by Radiology Interpretation Services, Inc. (RIS). The project as planned would consist of purchasing a MRI Unit and a CT (Computed Tomography) Unit, entering into a lease for space to operate out of, making leasehold improvements to the space leased and purchasing various additional equipment needed for the project. We have been asked to provide a "certified estimate of total cost of the proposed facility according to Alaska Code 7 ACC 07.010 and the following is an estimate of the total cost prepared in conjunction with Dr. Jeffrey Zuckerman of RIS.

The medical equipment's cost for both units is \$1,158,360 per the Toshiba American Medical Systems quote dated 12/19/2013 for a refurbished 1.5 Titan wide bore MR and refurbished 16 slice Aquilion CT system. The office Equipment and furnishings have an estimated cost of \$6,286. RIS anticipates leasing approximately 3,085 square feet in a wood framed masonry building at a Fairbanks mall built in 1984 and the present value of the lease payments are \$133,889. Based on the proposed floor plan of the facility, the cost of the leasehold improvements is estimated to be \$81,502 and this amount includes permits and architectural fees.

The aggregate total cost of the proposed project is \$1,380,037.

Please let us know if we can be of any further assistance.

Sincerely,

David A. Whitmore, Architect LLC

TABLE 2

Buildings

Buildings are structures consisting of building shell, exterior walls, interior framings, walls, floors, and ceilings. The asset cost would include a proportionate share of architectural, consulting, and interest cost for newly constructed or renovated facilities. In assigning the estimated useful lives in this table, the following factors were considered: the type of construction, the functional utility of the structure, recent regulatory or environmental changes, and the general volatility of the health care field.
